## PROJECTS

---

**Pet Together** June 2025 - Current

- Inspired by the chaos of managing a busy multi-pet household, developed a collaborative **Flutter** application that helps pet owners stay organized, coordinate responsibilities, and remain fully aligned on repetitive tasks
- Integrated **Firebase** in order to provide real-time activity updates and secure storage of pet information
- Hosted online for public use, consistently maintaining a **90%** daily usage rate among **10+** active concurrent users
- Continuously implementing and extending features, with plans to launch a targeted social media campaign, to enhance the platform's capabilities and significantly broaden its reach, driving greater public engagement

**Safety Sanctuary** July 2025

- Designed in response to the rise of Intimate Partner Violence, which has increased 13% over the past decade
- Spearheaded the development of a mobile application through **Android Studio** that generates personalized safety plans for abuse victims, offering around-the-clock access to nearby shelters and critical emergency hotlines
- Programmed using **Java** and **XML**, as well as utilizing **Firebase** for secure data storage and resource management

**Personal Portfolio** August 2025

- Developed and deployed an online portfolio utilizing HTML and CSS, which is regularly updated and maintained
